

UniPortal System Flow & User Manual

Institutional Demo Quick Reference

UniPortal is an institutional student portal and academic management platform supporting registration, enrollment, student services, academic records, examinations, progression decisions, reporting, and controlled role-based access. The current demonstration presents a practical institutional workflow that can be configured and expanded through consultation.

1. User Roles

Role	Primary responsibilities
Admin	Configures academic structure, courses, sessions, users, policies, dashboards, and system-wide oversight.
Registrar	Reviews enrollment, manages records, verifies results, approves progression decisions, and releases results.
Student	Updates permitted details, requests enrollment, follows status, uses services, and views released results.
Lecturer	Enters course marks, reviews calculated outcomes, and submits complete semester results.
Dean/HOD	Reviews submitted results for academic completeness and forwards them to the Registrar.
Finance (Pilot Concept)	Demonstrates future institutional fee, financial clearance, and payment workflow possibilities. Current implementation is intentionally limited for institutional consultation and phased rollout discussions.

2. System Flow

The institutional workflow links academic setup, student registration, controlled academic approvals, and leadership reporting in one traceable process.

FOUNDATION & ENROLLMENT	NEXT	RESULTS & REPORTING
1 Academic Setup	↓	6 Lecturer Mark Submission
2 Student Registration	↓	7 Dean/HOD Review
3 Enrollment Request	↓	8 Registrar Final Approval & Release
4 Registrar Review & Approval	↓	9 Student Result Access
5 Academic Record Creation	→	10 Institutional Reports

How the Flow Operates

1. **Academic setup:** Admin creates faculties, departments, programs, courses, sessions, and policy settings.
2. **Student registration:** Students confirm identity and academic profiles.
3. **Enrollment request:** Students select eligible courses and submit requests.
4. **Registrar review:** Registrar verifies details, selection, and credits before approval or correction.
5. **Academic records:** Approved enrollment establishes the semester academic record.
6. **Mark submission:** Lecturer enters marks; UniPortal calculates grades, points, credits, and GPA.
7. **Academic review:** Dean/HOD checks submitted results for academic completeness.
8. **Final approval:** Registrar verifies standing and approval history, then releases the result.
9. **Student access:** Students view and print only formally released results.
10. **Reporting:** Authorized staff generate progression and department performance summaries.

3. Key Institutional Benefits

- **Operational efficiency:** Reduces manual paperwork and result-processing burden.
- **Academic accuracy:** Improves examination consistency and calculation reliability.
- **Progression control:** Tracks supplementary and carry-over requirements automatically.
- **Accountability:** Records each review, approval, change, and release decision.
- **Transparency:** Improves student self-service while protecting unreleased results.
- **Decision support:** Provides institutional reports for academic leadership.
- **Policy alignment:** Adapts grading, promotion, and workflow rules to the institution.

4. Current Demo Scope

The current demonstration focuses on working institutional academic workflows. Planned items are presented as consultation and phased-expansion opportunities, not completed production modules.

CURRENT DEMONSTRATION SCOPE	PLANNED EXPANSION
• Registration & Enrollment • Academic Structure • Student Management • Academic Records • Examination & Academic Progression • Supplementary & Carry-Over Tracking • Timetable • Complaints / Helpdesk • Exam Clearance • Institutional Reports	• Finance integration • Payment workflows • Lecturer assignment controls • Advanced analytics and dashboards • SMS / Email notifications • Additional institutional workflows

5. Module Summary

Module	Purpose
Dashboard	Role-specific indicators, pending work, totals, and task links.
Academic Setup	Faculties, departments, programs, sessions, and structure.
Student Management	Identity, program placement, verification, and account status.
Course Management	Codes, titles, credits, level, semester, links, and active status.
Enrollment Management	Requests, Registrar decisions, reasons, tracking, and printable slips.
Academic Records	Semester courses, grades, credits, GPA, remarks, and history.
Examinations & Progression	Marks, calculations, standing, approvals, release, and student access.
Progression Reports	Supplementary, carry-over, pass, repeat/discontinued, and department lists.
Timetable	Course schedules, venues, lecturers, semesters, and programs.
Complaints / Helpdesk	Student requests, responses, handling status, and resolution.
Exam Clearance	Attendance, financial clearance, eligibility, notes, and approval.
Finance (Pilot Concept)	Demonstrates future institutional fee, financial clearance, and payment workflow possibilities. Current implementation is intentionally limited for institutional consultation and phased rollout discussions.
Audit Trail & Security	Role permissions and histories for decisions, changes, approvals, and releases.

6. Examination & Academic Progression

- **GPA / CGPA:** Calculated from course credit hours and grade points.
- **Grading policy:** Grade bands, pass marks, and points are institution-configurable and retained with the result.
- **Promotion policy:** GPA, credits, failed-course, repeat, and discontinuation thresholds follow configured rules.
- **Progression detection:** Failed courses are identified for supplementary or carry-over tracking; standing may be Pass, Supplementary, Carry Over, Repeat, Discontinued, or Suspended.
- **Approval workflow:** Lecturer Submitted → Dean/HOD Reviewed → Registrar Approved → Released.
- **Release control:** Students see released results only; lecturers and Dean/HOD reviewers cannot release final results.
- **Printable result sheet:** Shows institutional and student details, courses, marks, grades, GPA, CGPA, standing, and approval status.

DEMO CREDENTIALS

All demo accounts use: **UniPortal123**
Role-specific emails are listed in the demo login documentation.

7. Institutional Configuration

UniPortal is configurable per institution. Academic structures, grading policies, promotion rules, approval workflows, hosting, security controls, and reports can be adapted to the university's official regulations and governance requirements.
